Selling Points

► 180° Cat Tracking Camera

- Cat's behavior and toileting tracking from home to litter box view
- Fecal health monitoring
- 24/7 pet livestream
- Two-way audio

► Holistic Health Database

- Visualized report card
- Weight change
- Litter box usage frequency and duration
- Fecal images for self check-ups

► Touch-free Auto Waste Packing

- Auto-seal & auto-refill a new trash bag, overflow-secured packing
- 10L waste bin for up to 20 days free-scooping
- One piece of refill ring packs approximately 10 times for one cat household

► AI-powered Multi-cat Facial Recognition

- Identify cats of similar weights through facial features and weight change
- Personalized feline IDs

Main Functions

Visualized home wellness and litter box usage tracking with a 180° rotation camera

Fecal health monitoring through stool consistency and clump size

Multi-cat recognition via facial features and weight records

Touch-free auto waste packing

20 safety sensors and patented spiral sifting structure for 100% safety

Two-way audio

4-stages odor control to keep air clean and fresh

Patented anti-leakage cylinder with seamless ShieldBase

Compatible with most clumping cat litters

36 dB quiet operation for peace of mind

Detailed Product Information

Overall Cat Behavior Monitoring with AI Camera

Transitioning from **home to litter box view**, the 180° rotating camera monitors cats' **litter box behaviors and daily wellness**. Stay in loop about your cat's activities seamlessly, even from afar.

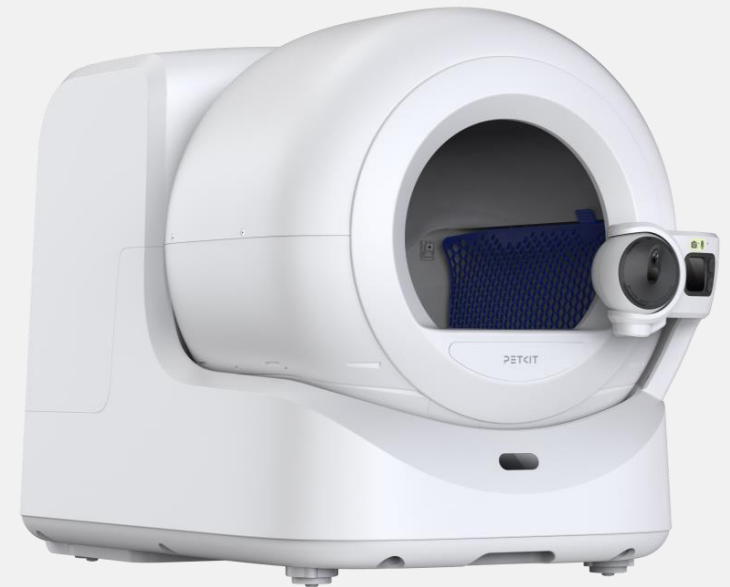

Auto-captured Images for Fecal Health Monitoring

By capturing **images of stool and clumps** during each cleaning cycle, the camera offers visual records of **urine clumps and stool consistency**, helping to identify signs of bowel or urinary issues.

AI Multi-cat Facial Recognition for multi-pet families

PUROTBOT ULTRA identifies cats by combining **AI-powered facial feature recognition** with weight measurement , facilitating precise identification in multi-cat households with cats of similar weights.

Detailed Product Information

Visualized Report Card for Easy Check-ups

Stay informed about cat's wellbeing and fecal health with the help of the **event-based cat litter box usage timeline**. Pet owners can monitor your cat's urinary and bowel problems based on these visual records.

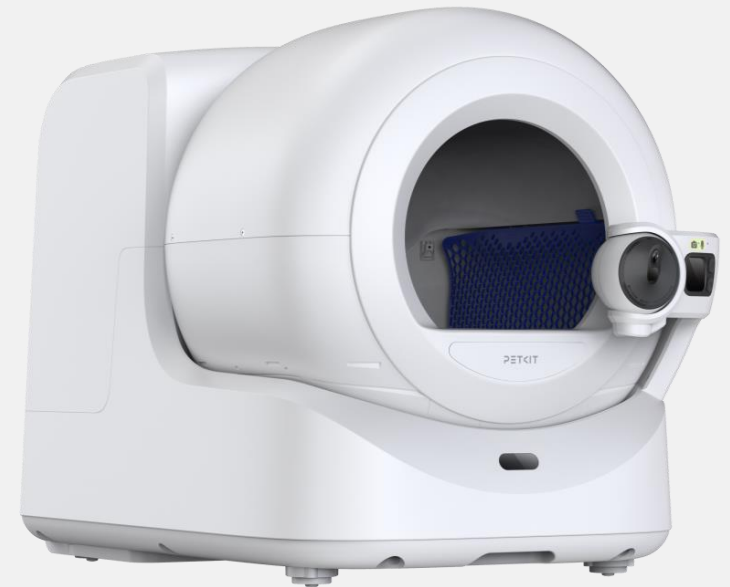

Smart App Control in One Tap Away

Easily control everything through the PETKIT app, including **auto-scooping modes, camera angle adjustment, litter emptying, device status**, and other smart settings.

Two-way Audio

No matter where you are, enjoy boundless connection with your feline companions via **two-way audio**.

Detailed Product Information

24/7 Pet Livestream

Join in your pet's day-to-night livestream room and track their at-home behaviors and litter box routines, even from afar.

See Clearly Day and Night

The camera seamlessly switches to **infrared night vision** and captures your cat's motion. Customize **LED fill light** settings during auto-scooping to ensure clear visibility for fecal monitoring.

Camera Privacy Protection

PETKIT app allows you to customize the **camera's working hours**, manage **pet visit detection**, or **turn off the camera** entirely to safeguard your privacy.

Detailed Product Information

Holistic Litter Box Health Database

By accessing to PETKIT app, pet owners can check through their pet's personalized feline profiles, including **toilet visit frequency**, **toileting duration** and **weight changes**. The app provides both data-driven and visual insights into urinary and bowel health, aiding in early health screening.

Patented Spiral Sifting Structure and Twenty Safety Sensors Guarantee 100% Safety for Your Cats

The cylinder keeps its entrance all times during **x-axis rotation** and features a **spiral sifting structure** to **eliminate pinch risks at source**. 20 safety sensors ensure maximum safety for every litter box visit.

Compatible with Most Clumping Litter

Pet owners can choose between two replaceable litter sifters, each designed for optimal cleanliness and to minimize litter usage based on the type of clumping cat litter they use. The **Litter Sifter P99032** is ideal for **larger particle litters**, while the **Litter Sifter P99033** works best with **finer-granule litters**.

Detailed Product Information

Touch-free Auto Waste Packing & 20 Days Free Scooping

Unleash a 100% hands-free and stink-free waste management with patented auto packing system. The packing system **auto-expands the trash bag** to **prevent spills**. One piece of refill ring can pack **approximately 10 times**. The 10L waste bin can hold up to 20 days free-scooping for one cat.

4-stage of Odor Control: Sealed Trunk Lid, Trash Bag of Leakproof Seal, Odor Eliminator N60, Auto-sealed Door

Sealed trunk lid keeps the lid closed to prevent odors from escaping. N60 effectively **neutralizes 96.2% of ammonia** from cat waste. Trash bag of leak-proof seal uses PE material for odor-escaping prevention. The auto-sealed door of waste bin closes after each auto-cleaning cycle, ensuring efficient **97.5% odor trapping**.

PETKIT

Detailed Product Information

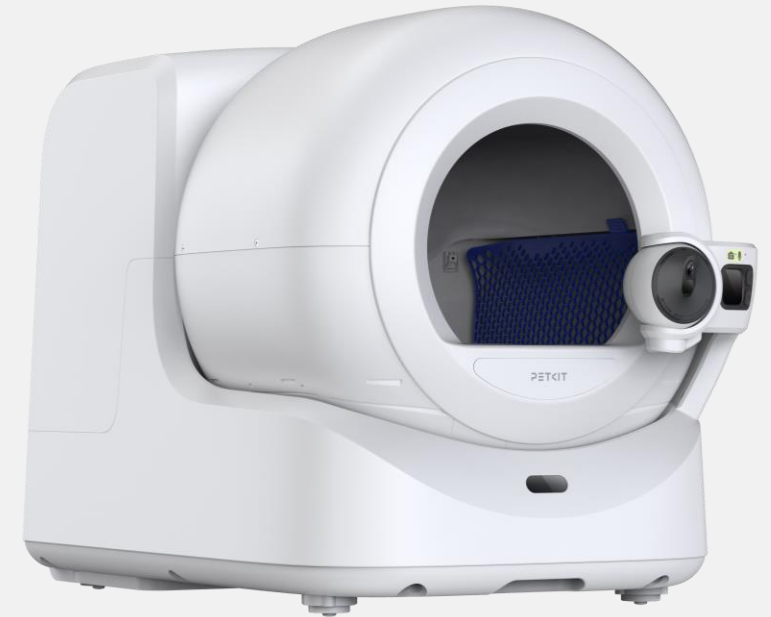

Anti-leakage Cylinder with Seamless ShieldBase

Featuring with built-in silicone strips of better seal, leakproof and durable cat litter pad, patented brim structure, and a **360° seamless ShieldBase**, the cylinder ensures superb **leakage prevention** and easy maintenance.

36 dB Whisper Quiet Operation

The noise level is equal to a quiet library, ensuring peaceful, stress-free experience for both pet owners and sensitive cats.

There will be scrolling text at the bottom of the screen.

Prompts	Description	Prompts	Description
 Out of trash bag soon, please replace the refill ring in time	The trash bag is running out. Please prepare a new refill ring.	 Out of trash bag, please replace the refill ring now	The trash bag has run out. Please replace a new refill ring.
 Trash bag not refilled, please double click OK button to start auto-refilling	Waste bin is not bagged. Please double press OK button to start auto-refilling.	 Trunk not installed	The trunk is not installed. Please check.
 Cat has approached	The cat approaches or enters the litter box during operation. (The device will automatically pause and alert, and it will resume after the pet leaves.)	 Device failure	Device failure, please check the details in the App.

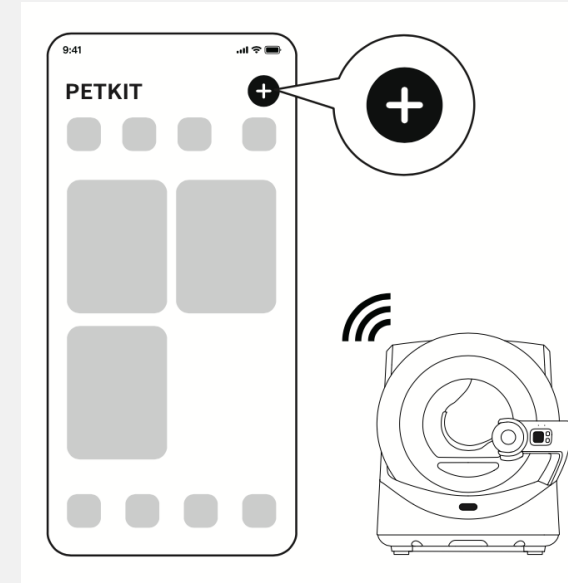

How to Bind PETKIT APP

Step 1:

Download the PETKIT App from the App Store or Google Play. Or scan the QR code to download and install.

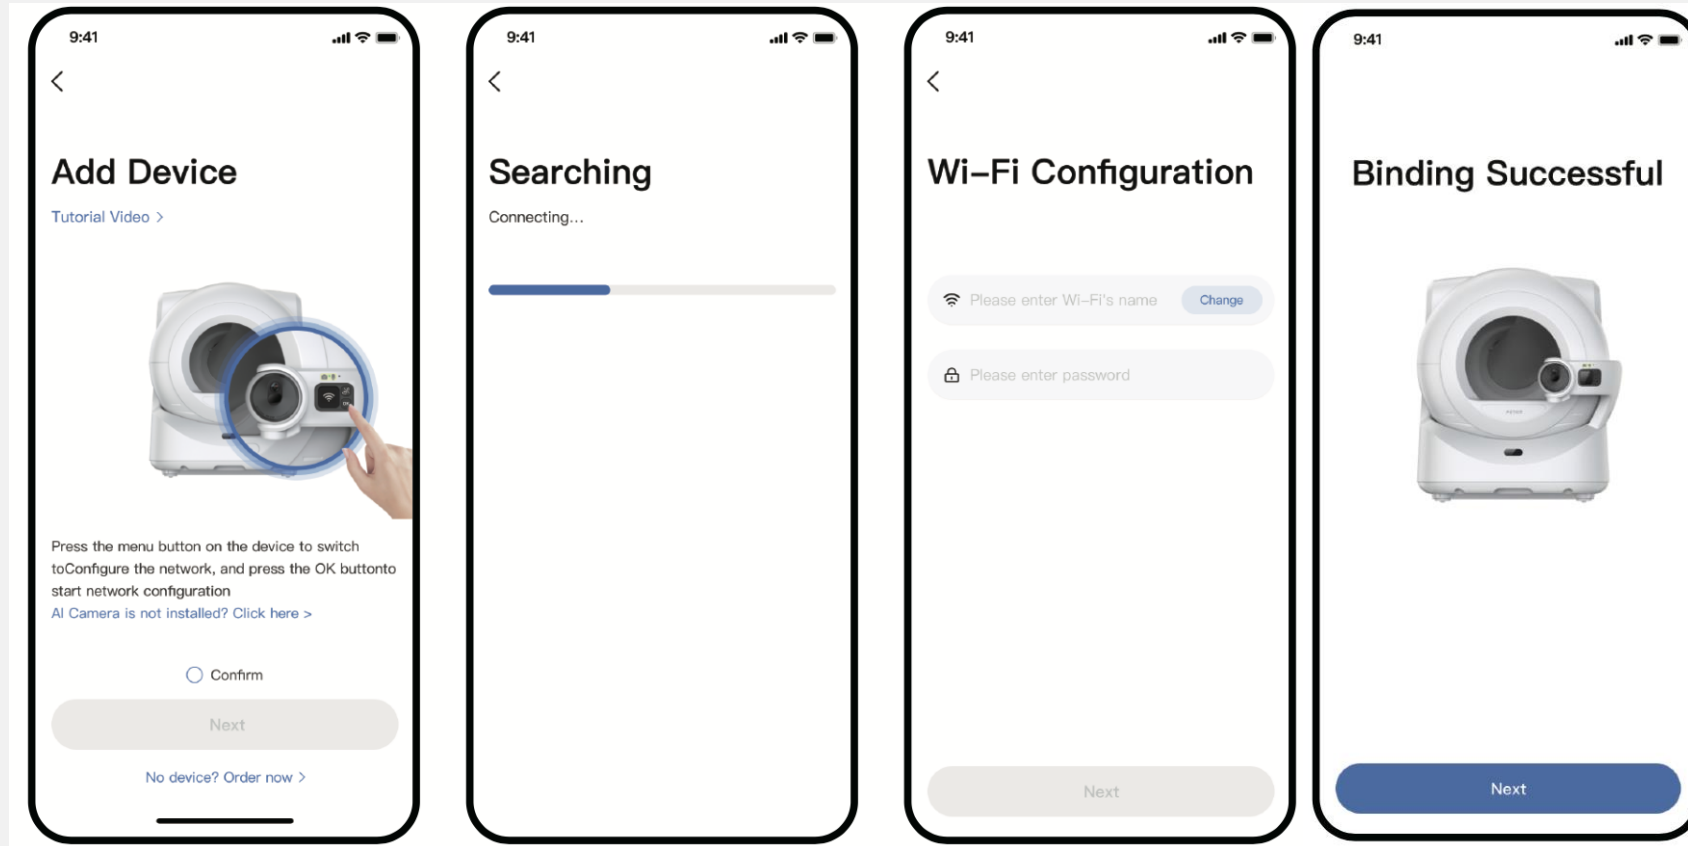

Step 2:

Open the PETKIT App, click “+” and select PETKIT PUROTBOT ULTRA WITH CAMERA SELF-CLEANING CAT LITTER BOX.

How to Pair with the PETKIT APP

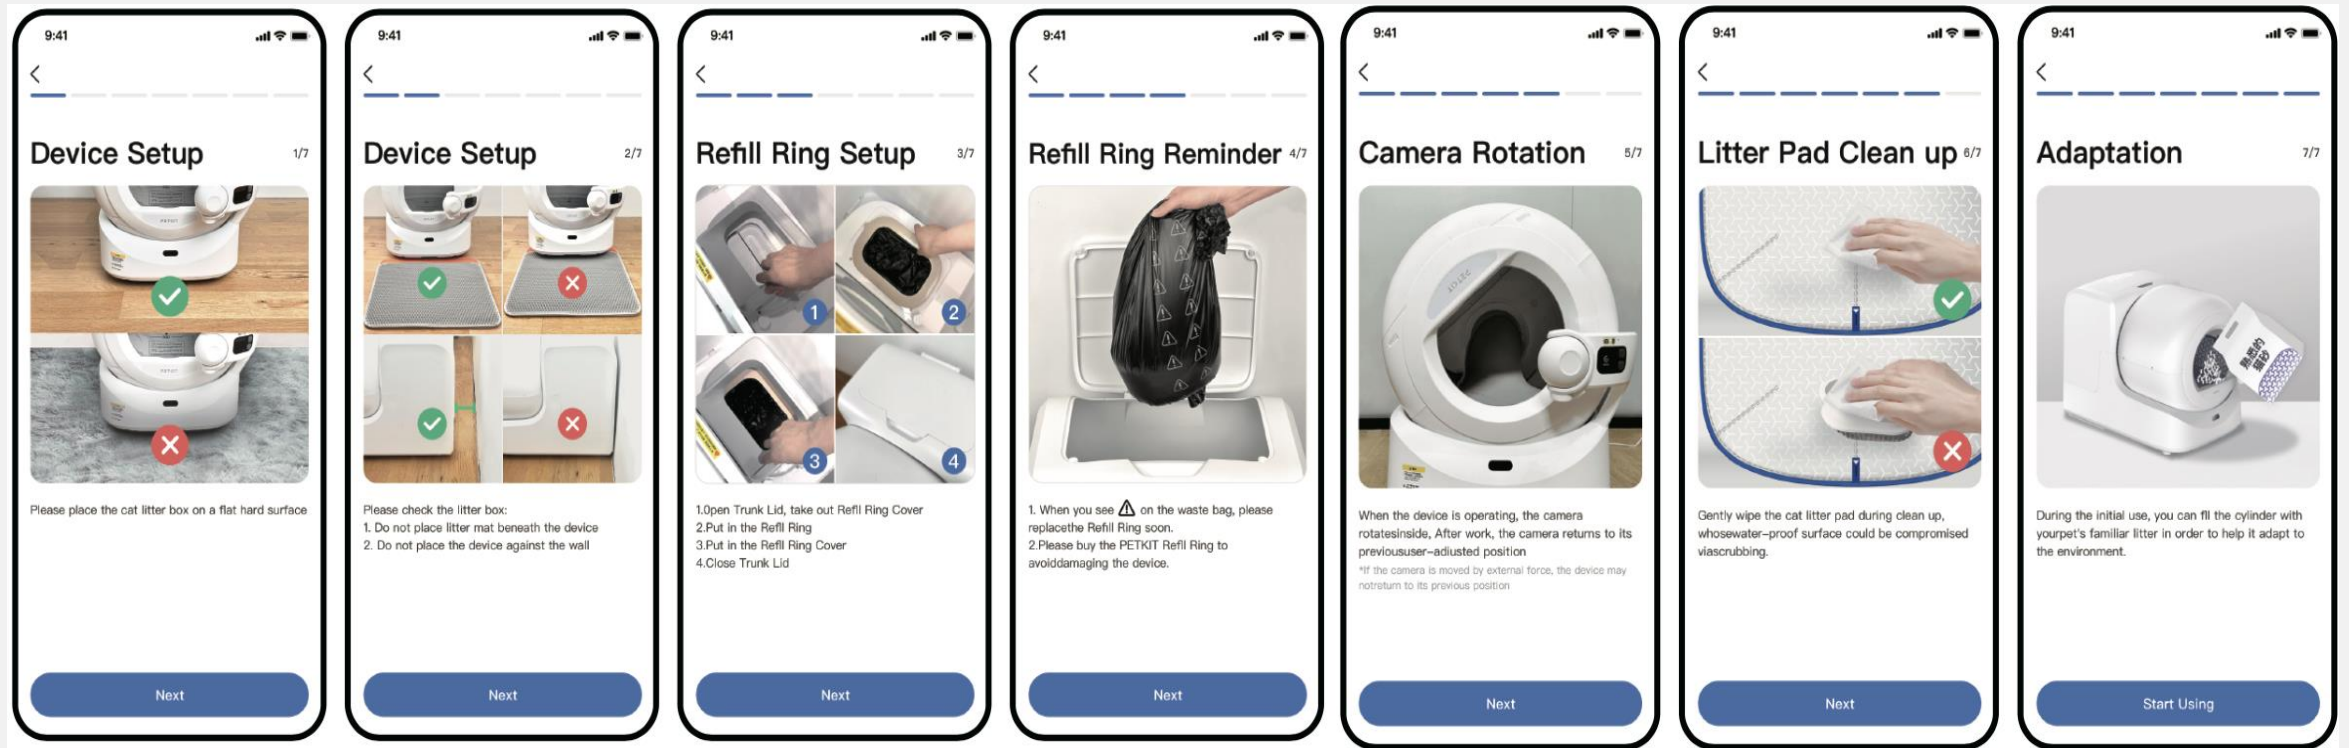

Step 3:

Follow the page guide to complete connection

How to Pair with the PETKIT APP

Step 4:

Read usage guide and activate

PART FOUR

04

01

Does PUROTBOT ULTRA have a weight limit?

We recommend a minimum weight of 1.5 kg (3.3 lbs) and a maximum weight of 10 kg (22 lbs) to use PUROTBOT ULTRA.

02

Can kittens use PUROTBOT ULTRA?

We do not recommend using PUROTBOT ULTRA for kittens or cats weighing less than 1.5 kg (3.3 lbs). If you have both young and adult cats, we suggest enabling Kitten Protection Mode via PETKIT app. This mode disables auto cleaning and periodic cleaning to ensure your kitten's safety.

03

Can I auto-pack the trash bag via app?

No. The auto waste packing process requires users to be present next to the device. You can start the auto-packing by pressing the button on the OLED screen. The entire process includes auto-packing, auto-sealing, removal of the trash bag, and auto-bagging. Once a sealed trash bag is ready, the user need to remove it. Auto-bagging will not initiate until the user take out the trash bag and double click the button on OLED screen for auto-bagging.

04

Can I use a generic trash bag for auto waste packing?

No, the auto waste packing system requires PETKIT's exclusive refill rings. These refill rings are designed for a seamless fit, ensuring smooth auto-packing. Using generic trash bags with the refill ring may lead to malfunctions.

05

How often should I replace a refill ring?

The refill ring package contains 3 pieces. One piece of refill ring can pack approximately 10 times, and the waste bin can hold one cat's waste for up to 20 days. The data was tested by PETKIT Lab based on the toileting frequency of a single adult cat. The replacement frequency depends on the number of cats in your household and their litter box usage patterns.

06

How often should I pack the waste?

Based on PETKIT's lab results, the waste bin supports up to 20 days of free-scooping for one cat. However, if you live in hot and humid conditions, we recommend packing the waste more frequently according to your preference.

07

Where there is a huge space in the trunk?

The large space inside the trunk of PUROBOT ULTRA is designed to accommodate the auto-packing system. This feature requires ample room to operate effectively. The packing module is engineered to lift up during operation, ensuring proper and successful packing of waste.

08

Can I place PUROTBOT ULTRA on a carpet?

For accurate weight measurements, PUROTBOT ULTRA should be placed on a hard, level surface. Maintain a distance of at least 5 cm (1.97 in) from walls and ensure that no objects obstruct the entrance.

09

What types of cat litter should I use for PUROTBOT ULTRA?

It comes with two litter sifters: Litter Sifter P99031, ideal for larger litter particles like tofu and mixed litter, and Litter Sifter P99032, compatible for finer particles like bentonite and mineral/clay litter. Both work well with most clumping cat litter, but we advise against using litter longer than 12 mm (0.5 in).

10

How can I prevent fecal streaking on the cylinder?

Streaking may occur if your cats don't always cover their poops or have soft or watery stools. We recommend using fast, tight-clumping cat litter instead of slow-clumping litter. You can enable Waste Covering Mode in the scooping setup via the PETKIT app, which helps evenly cover waste in cat litter before cleaning cycle to minimize fecal streaking.

11

How do I train my cat to use PUROTBOT ULTRA?

Position the PUROTBOT ULTRA where the previous litter box was located, using the same type of litter. Mix a scoop of the old litter with the new litter to maintain a familiar scent. Allow waste to accumulate gradually in the old box to ease the transition. To help your cat get accustomed to PUROTBOT ULTRA, gently guide them inside when needed. Be patient with sensitive cats that may take longer to adapt to the automatic litter box.

12

How does PUROTBOT ULTRA ensure my cat's safety?

PETKIT always put cat's safety for top priority. PUROBOT ULTRA features X-axis rotation to keep the entrance open at all times and is equipped with 20 high-precision safety sensors, including advanced proximity and weight sensors. The litter box immediately stop rotating when a cat enters the cylinder, and the weight sensors ensure it remains stationary while your cat is inside until they exit.

13

Do I need to use PETKIT special trash bags?

Using incorrectly sized or overly thick trash bags might lead to machine abnormalities. Third-party waste bags might be too thick, preventing proper attachment to the ring and affecting the waste container's operation.

FAQs

14

Will PUROTBOT ULTRA still works if the connection is lost?

Yes, even without a network connection, PUROTBOT ULTRA will operate according to your preset settings. However, the PETKIT app will not update litter box usage data when the network is lost.

15

How do I update the firmware?

PUROTBOT ULTRA firmware supports OTA (over-the-air) updates remotely, allowing for progressive releases and enhancements of new features. You will need to manually update your firmware through the PETKIT App.

16

How do I clean PUROTBOT ULTRA?

Remove the detachable components of PUROBOT ULTRA: the cylinder, litter sifters, cat litter pad, trunk, and refill ring cover. Then you can wash these components. Wipe the base of the main unit as needed. Do not rinse the base of the main unit with water. Make sure all parts of the products are completely dry before reassembly.
